

## **Special Educational Needs**

All the children in the Centre have their own special needs, but sometimes they may benefit from extra support. We have a speech therapist who visits the Nursery regularly, who gives support and advice to parents and staff on any speech related aspects of young children's development.

If further help is needed by a child we will always follow the Code of Practice for Special Educational Needs and ask parents' permission to seek outside specialist advice. Once it becomes clearer how a child might be best supported, parents are informed and kept up to date with how their child can be assisted.

If you have any questions relating to special educational needs, please speak to a member of staff, or in particular to Lynda Bignell, who is the Special Educational Needs Co-ordinator.
