

Our Vision, Values and Principles

Our Vision for Frizington Children's Centre

We will provide appropriate support and services to all children aged between 0 to 5 years, working together with other agencies.

We will create, with our partners, a Children's Centre which is the hub of a community network.

Our Values

We will offer support to all families regardless of their social, economic and demographic background.

We will take an holistic approach to providing support for families as a whole unit.

Our Principles

We will be well organised, employ well trained staff and provide high quality services.

We will provide user friendly information for families, provide a friendly point of contact; listen and respond to individual needs.

We will develop training and learning opportunities for families and establish and maintain links with other professional services.
